Bluebeam Essentials & Max Mini Camp

Bluebeam Essentials Bootcamp

Taught by a Bluebeam Certified Instructor with 35 years of commercial construction experience, this is a fundamental course designed for learners that are new to Bluebeam Revu. By the end of these sessions' participants will be able to navigate, scale, markup, and manipulate PDF documents for their teams and will have the knowledge necessary to pass the Bluebeam Professional Exam should they choose to do so.

- Session 1 - Overview and Features, Interface + Profiles, Navigation Essentials
- Session 2 - Document Manipulation, Scale + Calibration, Markup Tools
- Session 3 - Properties Toolbar, Toolchest, Markup List
- Session 4 - Stamps, Bluebeam Studio

Bluebeam Max Mini-Camp

The Supercharge Your Workflow Mini-Camp is an immersive, hands-on training experience designed to help construction professionals harness the full power of Bluebeam Max, including AI-assisted reviews, intelligent markup automation, sheet stitching, and natural-language interaction with PDFs using Claude AI.

Through two highly impactful 2-hour live sessions, participants will learn how to transform traditional PDF workflows into intelligent project management systems that accelerate reviews, improve coordination, and uncover issues before they become costly field problems.

This mini-camp is ideal for project managers, project engineers, estimators, superintendents, BIM/VDC professionals, coordinators, and operations leaders seeking practical, real-world applications of AI inside construction document workflows.

Bluebeam Essentials & Max Mini Camp

What Makes Bluebeam Max Different?

Bluebeam Max introduces advanced AI-powered capabilities that fundamentally change how teams interact with drawings, specifications, and project documentation.

Participants will gain exposure to innovative workflows including:

- Claude AI Integration — “Talk to your PDFs” using natural-language prompts to summarize specifications, identify scope gaps, search markup data, and automate repetitive tasks
- Sheet Stitching — Automatically combine multiple drawing sheets into one continuous navigable view for large-scale project coordination
- Smart Review — AI-assisted document review that helps identify discrepancies, design conflicts, and coordination issues early
- Smart Overlay — Intelligent drawing comparison tools that detect revisions and scope changes across sheets and project phases
- Magic Markups — Advanced markup automation tools including duplicate, convert, and offset capabilities that dramatically reduce repetitive clicks
- Connected Workflows — Better coordination between 2D PDFs, BIM workflows, Studio Sessions, and field collaboration tools
